# ABOUT CCTV SYSTEM.

It's an Honor to be the Company to be Presenting this type of MOBILE Surveillance CCTV System to **MODERN COAST BUSES**. It will be a great Privillage and a delight to be given the opportunity to be your Installer.

As per the Security Issues that have been Occuring along the Road **SECURE DIGITAL LIMITED** request Humbly that you accept this project and it will enable you operate your Business with ease and make your customers more safer than before. It will also reduce the delays that occure when travelling where you have to take every customers Photo which also makes some customers uncomfortable.

This System will use very strong IR Cameras and it will record every activity in the Bus and give the location and the speed. The DVR will be used to Record and the Information can be kept for more than 20 days depending with Hard Disk Size. Secure Digital Limited will provide very high quality products where SDL has the Full Support from the Manufacturer.

HIKVISION manufacturing company is our partner and after the downpayment of the project is done we will have four Technical Chinese Men From HIKVISION to come and Give SDL the Support and thats an Accurance.

We have indicated the best security products having used them and as shown through the Car DEMO Inside the BUS we will Install one Camera to view the Driver and the rest two to view the Passangers inside the Bus.

We have other CCTV Products from HIKVISION Manufacturing company located in China and Distributed from UK at their head Office.

SDL also deals with other companies in regard to CCTV eg GKB, X-VISION, AVER MEDIA etc.

**Note:-** HIKVISION have the best DVR's (Digital Video Recorder) they can be used to connect all the cameras and you install a hard disk for recording.

SDL has the Latest HIKVISION DVR called the Hybrid DVR that can have both Analogue and IP cameras.

The DVR can be connected to the Local Area Network (LAN) and you can view via the Network using the DVR Software.

For the cameras We have IP and Analogue (Bullet, Dome, Speed Dome)

# ABOUT CCTV SYSTEM.

**Note:-** We do have other types of cameras eg Box Cameras this type of cameras you choose the lens` you want to use. There are other new shapes that has come recently they are dome but all weather Dome type of cameras. Like the one indicated to install in your Buses.

The CCTV Installations have several types of systems that can be used:-

- ❖ We have the one that you use Coaxial Cable and you connect the Cameras to a DVR Machine.
- ❖ There is the system where by you use the coaxial cable and you connect the Cameras to a Carpture card that is installed in the desktop Computer machine.
- ❖ The other system is where you use IP cameras which use CAT 5 or CAT 6 type of cable this system the cameras are connected and are inter linked with the Desktop. You can use the network within the Office.
- ❖ The same kind of IP camera system has now improved and we have DVR for IP Cameras. This system is best for large Installations.
- ❖ The other System are the Wireless Cameras.

**NOTE:-** All the Systems mentioned can be interconnected to Internet either WAN or LAN.
